

- Drastically reduce rates on phone calls throughout the world
- Save even more by calling from one IP Phone to another
- Easily connects to a corporate LAN or another broadband interface (DSL or cable modem with router)
- Seamlessly integrates into calling environment – just like using a standard phone
- Platform provides a gateway to host of value-added telephony services

IP Phone™

Net2Phone® Part # 401-7601

Save on most calls to any phone, anywhere in the world! Perfect for the SOHO (small office/home office) environment, the IP Phone allows users to make high-quality long distance calls over the Internet...at incredibly low rates!

Voice Quality You Expect At Rates You Don't

The IP Phone allows you to make inexpensive telephone calls anywhere in the world. As these calls are routed over Net2Phone's managed IP network and bypass much of the traditional phone network, you can now receive incredibly low rates with the quality calling experience you expect.

Save Money in a Small Office/Home Office Environment

Benefit from reduced rates on calls throughout the world. Place inexpensive calls from your IP Phone to any phone in the world. Save even more by calling from one IP Phone to another. In addition, the suite of available telephony services will only increase the efficiency of your business.

Seamless Integration into Any Office Environment

The IP Phone works with existing broadband connections or LANs through a 10 Base T Ethernet interface. Simply connect it to your broadband interface (DSL, cable) or LAN and easily configure it through the LCD menu-driven prompts. By ensuring high-quality calling without additional investment, you are able to easily measure and realize a speedy return on your investment.

Specifications
